EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Rob Griffith (Reg. No. 48,956) on 10/30/2008.

The claims are to be amended as indicated on the following page:

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A system for providing a VPN (Virtual Private Network) service by connecting a VPN to a mobile communication network, comprising:

a home agent (HA) in which location information of a mobile node (MN) and information about the VPN service for the MN are stored when the HA receives from the MN, a location registration request message for the VPN service;

a foreign agent (FA) for receiving location registration information from the MN, transmitting a location registration request message to the HA, receiving information about the VPN service from the HA and transmitting data to an ISP (Internet Service Provider) router in a same network as that of the FA, when receiving a VPN service request;

an ISP server positioned between the ISP router of the FA network and an ISP router of the VPN, for managing information on the ISP routers and establishing IP tunneling between the ISP routers;

a router network for routing between the FA network and the VPN, and for receiving and transmitting the data using an IP tunnel to a correspondence node; and

a VPN server connected to the ISP router of the VPN, for providing the VPN service ~~connected to the ISP router of the VPN~~.

2. (Previously Presented) The system as claimed in claim 1, wherein the ISP server searches the ISP router of the FA network using an address of the FA.

3. (Original) The system as claimed in claim 1, wherein the HA prevents the MN from accepting a call request received from a specific node in an IP network while the MN is performing the VPN service.

18. (Cancelled)

19. (Previously Presented) The system as claimed in claim 1, wherein the MN transmits an address of the HA and an address of the VPN server to the FA during VPN registration, and performs the VPN service by receiving a temporary ID for use of the VPN from the FA during the location registration.

20. (Currently Amended) The system as claimed in claim 1 ~~claim 4~~, wherein the MN stores the address of the VPN server and an address of a router in the network, received from the FA, and performs the VPN service using the received addresses.

21. (Currently Amended) A method for providing a VPN (Virtual Private Network) service to an MN (Mobile Node) located in an FA (Foreign Agent) network, connected to the MN, comprising the steps of:

managing in an ISP (Internet Service Provider) server information on ISP routers for establishing an IP (Internet Protocol) tunnel between an ISP router in the FA network and an ISP router of the VPN;

upon receiving a location registration request message for the VPN service from an FA in an HA (Home Agent), storing an address of the FA connected to the MN in the HA, wherein the HA further comprises information about the VPN service for the MN;

receiving information about the VPN service from the HA in the FA in response to the reception of the location registration request message by the HA;

establishing an IP tunnel between the ISP router in the FA network and the ISP router of the VPN; and

Art Unit: 2442

receiving and transmitting ~~the~~ data from/to the VPN for performing the VPN service using the IP tunnel .

22. (Previously Presented) The method as claimed in claim 21, further comprising blocking an Internet service when being in a VPN service state.

23. (Previously Presented) The method as claimed in claim 21, further comprising transmitting a location registration failure message for the VPN service upon failure to receive a reply signal within a time period after transmitting the location registration request message.

24. (Previously Presented) The method as claimed in of claim 21, further comprising activating a timer for a time period when the VPN service is available and performing a VPN service mode.

25. (Previously Presented) The method as claimed in of claim 21, further comprising transmitting from the MN an address of the HA and an address of the VPN server to the FA during VPN registration, and performing the VPN service by receiving a temporary ID for use of the VPN from the FA during the location registration in the MN.

26. (Previously Presented) The method as claimed in of claim 21, further comprising storing the address of the VPN server and an address of a router in the network received from the FA in the MN, and performing the VPN service using the received addresses.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest the concept of having a foreign agent retrieving VPN service information from a home agent when establishing a VPN connection in the context of the applicant's claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DOUGLAS B. BLAIR whose telephone number is (571)272-3893. The examiner can normally be reached on 9:00am-5:30pm.
